## THE LIBERTY LOAN

By W. G. McAdoo, Secretary of the Treasury.

For the purpose of:

Equipping with arms, clothing and food for our gallant soldiers who have been called to the field;

Maintaining our Navy and our valiant tars upon the high seas;

Providing the necessary means to pay the wages of our soldiers and sailors and, if the bill now pending in the Congress passes, the monthly allowances for the support of their dependent families and to supply them with life insurance;

Constructing a great fleet of merchant vessels to maintain the line of communication with our brave troops in France, and to keep our commerce afloat upon the high seas in defiance of the German Kaiser and his submarines;

Creating a great fleet of aeroplanes, which will give complete supremacy in the air to the United States and the brave nations fighting with us against the German military menace; and for other necessary war purposes.

The Congress of the United States has authorized the Secretary of the Treasury to sell to the American people bonds of the United States bearing four per cent interest, with valuable tax exemptions, and convertible under certain conditions into other issues of United States bonds that may be authorized by the Congress. The official circular of the Treasury Department gives full details.

There is now offered to the American people a new issue of \$3,000,000,000 of bonds to be known as the Second Liberty Loan. They will be issued in such denominations and upon such terms that every patriotic citizen will have an opportunity to assist the Government by lending his money upon the security of a United States Government bond.

It is essential to the success of the war and to the support of our gallant troops that these loans shall not only be subscribed, but oversubscribed. No one is asked to donate or give his money to the Government; but every one is asked to lend his money to the Government. The loans will be repaid in full with interest at the rate of four per cent per annum. A Government bond is the safest investment in the world; it is as good as currency and yet better, because the Government bond bears interest and currency does not. No other investment compares with it for safety, ready convertibility into cash, and unquestioned availability as collateral security for loans in any bank in the United States. People by thousands ask the Treasury constantly how they can help the Government in this war. Through the purchase of Liberty Bonds everyone can help. No more patriotic duty can be performed by those who cannot actually fight upon the field of battle than to furnish the Government with the necessary money to enable it to give our brave soldiers and sailors all that they require to make them strong for the fight and capable of winning a swift victory over our enemies.

We fight, first of all, for America's vital rights, the right to the unimpaired and unobstructed use of the high seas, so that the surplus products of our farms, our mines and our factories may be carried into the harbors of every friendly nation in the world. Our welfare and prosperity as a people depend upon our right of peaceful intercourse with all the nations of the earth. To abandon these rights by withdrawing our ships and commerce from the seas upon the order of a military despot in Europe would destroy prosperity and bring disaster and humiliation upon the American people.

We fight to protect our citizens against assassination and murder upon the high seas while in the peaceful exercise of those rights demanded by international law and every instinct and dictate of humanity.

We fight to preserve our democratic institutions and our sovereignty as a nation against the menace of a powerful and ruthless military autocracy headed by the German Kaiser, whose ambition is to dominate the world.

We fight also for the noble ideal of universal democracy and liberty, the right of the smallest and weakest nations equally with the most powerful to live and to govern themselves according to the will of their own people.

We fight for peace, for that just and lasting peace which agonized and tortured humanity craves and which not the sword nor the bayonet of a military despot but the supremacy of vindicated right alone can restore to a distracted world.

To secure these ends I appeal to every man and woman who resides upon the soil of free America and enjoys the blessings of her priceless institutions to join the League of Patriots by purchasing a Liberty Bond.

NO GROUND FOR PESSIMISM

It is wholly without precedent that the country which is advancing billions in credit is witnessing the spending of those billions almost entirely within its own borders. When we lay a road from the French from the landing to the front, every spike and rail and tie is American made. Where the French provide their own lumber, expert American machinery is getting it cut and putting it in shape. These are only a few instances of many, and he must be, indeed, a pessimist on the future of the United States who fails to see their tremendous bearing upon security prices.—Wall Street Journal.
